1. Regarding the IDS filed March 15, 2001 (Paper No. 3), copies of most the references listed thereon are located in the various parent applications. It is noted that copies of a few of these references have been provided in the instant application. The parent applications are currently unavailable to the examiner. Consequently, the only citations that have been initialed correspond to the copies that have been provided in the instant application. The examiner will consider the rest of the references when they become available.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(f) he did not himself invent the subject matter sought to be patented.

3. Claims 7-31 are rejected under 35 U.S.C. 102(f) because the applicant did not invent the claimed subject matter.

In view of the decision in Patent Interference No. 104,311, it is determined that applicant did not invent the claimed subject matter such as the pump shaft and motor shaft being disposed perpendicular to each other.
